

EMS Annual Meeting 2018

European Conference for Applied Meteorology and Climatology

Weather and climate: global change and local hazards
Corvinus University, Budapest, Hungary

The EMS Annual Meeting provides a forum for all actors in the meteorological, climatological and related communities on the science, the applications and the benefits for society.

The challenges for meteorology are growing. Citizens and decision-makers require information on the consequences of a changing climate, and especially on weather and climate hazards that have a significant impact on humans, nature and infrastructure.

The essential role of meteorology, the provision of reliable forecasts and trustworthy warnings, has expanded towards impact predictions and long-term projections of climate change to support national strategic decisions aimed at saving lives and reducing the costs of natural hazards.

Among the challenges addressed in the session programme are:

- Challenges in observation, instrumentation and monitoring
- Developing new applications also using big data processing
- Developing new methods for hazard forecasting
- Optimising sectoral benefits (e.g. agriculture, energy, transport, urban planning)

Exhibiting at the EMS2018 will provide conference participants with valuable information on your products and services.

Introduce your brand to decision makers in meteorology

CONFERENCE ORGANISATION

The conference is organised in five parallel sessions during each day, with half-hour coffee breaks in the morning and the afternoon; the poster sessions with plenty of opportunities for discussion are held in the conference foyer at the end of each day. Plenary keynote talks are given on Tuesday, Wednesday and Thursday morning from 9:00 to 9:30. These cover new and debated topics related to each of the three programme streams.

EMS ANNUAL MEETING PARTICIPANTS

We expect some 600 participants from Europe, but also beyond. The majority of the EMS Annual Meeting participants come from universities, national meteorological services, and public or governmental research institutions. International organisations are well represented and some four percent come from private service providers. One third of participants are students or in the very early stages of their career; some 35% are female.

EXHIBITING at the EMS2018 offers the opportunity to introduce your brand to decision makers in meteorology, and to provide conference participants with valuable information about your products and services. With the large numbers of early career scientists the conference is also an excellent opportunity to scout young researchers looking for an international career.

EXHIBITION BOOTH

Have an exhibition booth (6 sqm) € 2.100
Two complimentary registrations are included.

SPONSORING OPTIONS

We would like you to consider sponsoring the EMS Annual Meeting. This event is an excellent opportunity to meet with other key players in the meteorological and climatological communities.

ICEBREAKER (1) € 5000

Your company logo on the buffet and bar tables, material provided by sponsor; announcement during the Opening.

POSTER SESSION (3) € 2000

Company logo on each drinks/snacks table, material provided by sponsor.

COFFEE BREAK (8) € 2000

Company logo on each coffee break station table, material provided by sponsor.

WRITING PAD (1) € 600

Company logo on the writing pad provided to all participants.

LOGO RECOGNITION on the website and on a slide displayed *complimentary*
during the Opening is granted to all sponsors.

ADVERTISEMENT

Have an advert in the programme book:

Full size: 17.7 cm (width) x 24.0 cm (height), black & white € 300

Half size: 17.7 cm (width) x 12.0 cm (height), black & white € 150

All prices are exclusive of VAT.

More details on booking of exhibition booths will become available at <http://www.ems2018.eu>.

FUTURE EVENTS

9-13 September 2019: Copenhagen

7-11 September 2020: Bratislava

6-10 September 2021: Barcelona
